What is this product?

Type

This is a securities fund (UCITS) under regulation of Swedish law.

Term

The fund does not have a maturity date. The fund management company has the right to close the fund and redeem the fund units as described in the information included in the fund prospectus.

Objectives

The fund is an exchange-traded index fund with the objective to track the performance of the SHB Nordic High Div Low Vol as closely as possible.

Fund returns are determined by how the fund's investments in equities increase or decrease in value. The index will be replicated through optimized (sample-based) physical replication, which means that the fund invests directly in most of the equities included in the index. Tracking error is expected to be less than 0.2% under normal market conditions. The management fee, customer flows, index rebalancing and corporate events all result in transaction costs for the fund, which are not present in the index. These are the main factors that impact the fund's ability to replicate the index.

Handelsbanken Nordic High Dividend Low Volatility Criteria Index (SEK) consists of equities in Nordic companies that are selected based on dividend yields as well as the risk and liquidity of the equities. The index followed by the fund includes sustainability requirements. Companies that do not fulfil the defined requirements with regard to sustainability are excluded from the index.

The fund follows an index that includes sustainability requirements. Companies that do not meet the defined requirements for sustainability are excluded from the index. The sustainability requirements include international standards and guidelines for the environment, social responsibility and corporate governance. The requirements also include the fund's exclusion of companies involved in the production or distribution of fossil fuels, military equipment, tobacco, alcohol, gambling, cannabis and pornography.

The fund can invest in derivative instruments as part of the fund's investment focus. However, the use of derivative instruments is of such a nature that it only has a marginal impact on the fund's risk level.

The share class normally distributes dividends in March, May, September and November each year. The objective is to annually distribute 4.5% of the value of the units at the time of the Management Company's decision about distributions. However, distributions can be both higher and lower.

Normally, you can purchase and sell fund units on the stock market, the so-called secondary market, on all banking days. You can also create and redeem units directly with the management company on the so-called primary market.

Additional information about the sustainability work and the funds index, may be found in the prospectus.

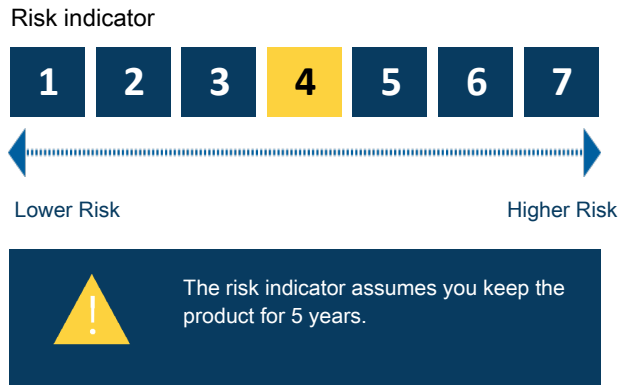

Intended retail investor

This fund may be suitable for investors who intend to hold their investments for at least 5 years and who understand that the money invested in the fund may both increase and decrease in value and that it is not certain that the entire capital invested can be returned. Investing in the fund does not require any specific prior knowledge or experience of UCITS or financial markets.

Depository: J. P. Morgan SE - Stockholm Bankfilial.

What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

We have classified this product as 4 out of 7, which is a medium risk class. This means the fund has medium risk of ups and downs in the share value. The indicator primarily reflects increases and decreases in the assets the fund is invested in.

This product does not provide any protection from future market performance. You could therefore lose some or all of your investment.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavorable, moderate and favorable scenarios show the worst, average and best performance for the product over the last 10 years. Given that the share class does not have 10 years of historical performance, the relevant benchmark index or, alternatively, historical performance from another share class in the fund, is used for the calculation of the scenarios.

Recommended holding period: 5 years			
Investment amount 100,000 kr			
Scenarios		If you exit after 1 year	If you exit after 5 years
Minimum	There is no minimum guaranteed return. You could lose all of your investment.		
Stress Scenario	What you might get after costs	12,000 kr	12,400 kr
	Average return each year	-88.00 %	-34.13 %
Unfavourable Scenario	What you might get after costs	79,600 kr	88,100 kr
	Average return each year	-20.40 %	-2.50 %
Moderate Scenario	What you might get after costs	109,000 kr	151,600 kr
	Average return each year	9.00 %	8.68 %
Favourable Scenario	What you might get after costs	128,700 kr	194,300 kr
	Average return each year	28.70 %	14.21 %

The unfavorable scenario occurred during the period 12/2021 - 06/2024, the moderate scenario occurred 07/2017 - 07/2022 and the favorable scenario occurred 09/2014 - 09/2019. What happens if Handelsbanken Fonder AB is unable to pay out?

By law, the fund's assets may not be held in custody by the fund management company. Instead, each fund must have a specific depositary that handles the safekeeping of the fund's assets. In the event of the bankruptcy of the fund management company, the management of the fund is taken over by the depositary. There is no compensation or guarantee scheme for investors in the fund.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment. If the fund is included as part of another product, e.g., unit-linked insurance, additional costs may arise for that product.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- 100,000 kr is invested

	If you exit after 1 year	If you exit after 5 years
Total Costs	320 kr	2,450 kr
Annual Costs Impact (*)	0.32 %	0.35 % each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 9.03 % before costs and 8.68 % after costs.

Composition of costs (amount in SEK is based on an investment of SEK 100,000).

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

The fund does not have a minimum holding period requirement but since investments are made in equities, it is suitable for a long-term investment horizon. You should be prepared to save in the fund for at least 5 years. You can sell fund units in the stock market, in the so-called secondary market, normally every bank day. In the case of such a transaction, a brokerage fee is charged. You can also redeem units directly against the Fund Management Company, in the so-called primary market. Then, according to the fund regulations, a fee may be charged.

How can I complain?

If you wish to make a complaint about the fund, you can contact the person who advised you or sold you the product. You can also contact the fund management company directly at: klagomal@handelsbanken.se or write to Handelsbanken, Complaints Officer, 106 70 Stockholm, Sweden.
